Description of the mobile veterinary clinic

Specialized veterinary vehicle for outbound biosterilization of stray animals. The car is equipped with all the necessary equipment for sterilization of stray animals. Placement of operating equipment, equipment in the compartments takes into account the tactics of its operational use for its functional purpose. All equipment is individually placed and secured with clamps.

Fastening mechanisms provide reliable fastening of all equipment while moving the car, regardless of the terrain.

The design of the superstructure provides high resistance to torsional dynamic loads and vibrations.
