Description of the special gas and smoke protection service vehicle (GSPSV)

Gas and smoke protection service vehicle GSPSV is a specially equipped vehicle with a carrying capacity of 1.1 tons and a 4x2 wheel arrangement, designed for the prompt arrival to a place of an emergency, transportation of special gear and equipment, supporting emergency rescue operations associated with the use of personal protective equipment for respiratory and visual organs (including compressed air devices).

The vehicle is constructed on the basis of a front-wheel drive van, divided into two compartments: passenger and cargo.

The passenger compartment is equipped with three standard seats (including the driver's one), handrails, and interior lighting lamps. All doors are provided with latches, to keep them in the open position, automatic locks and sliding glass with sealers. The cargo compartment is equipped with interior lighting lamps, one standard sliding door on the right and two swing doors on the rear. Doors are provided with latches for holding open and automatic locks. The cargo compartment contains places for storing 24 breathing apparatuses and other equipment.
